Southernmost Point Plaza

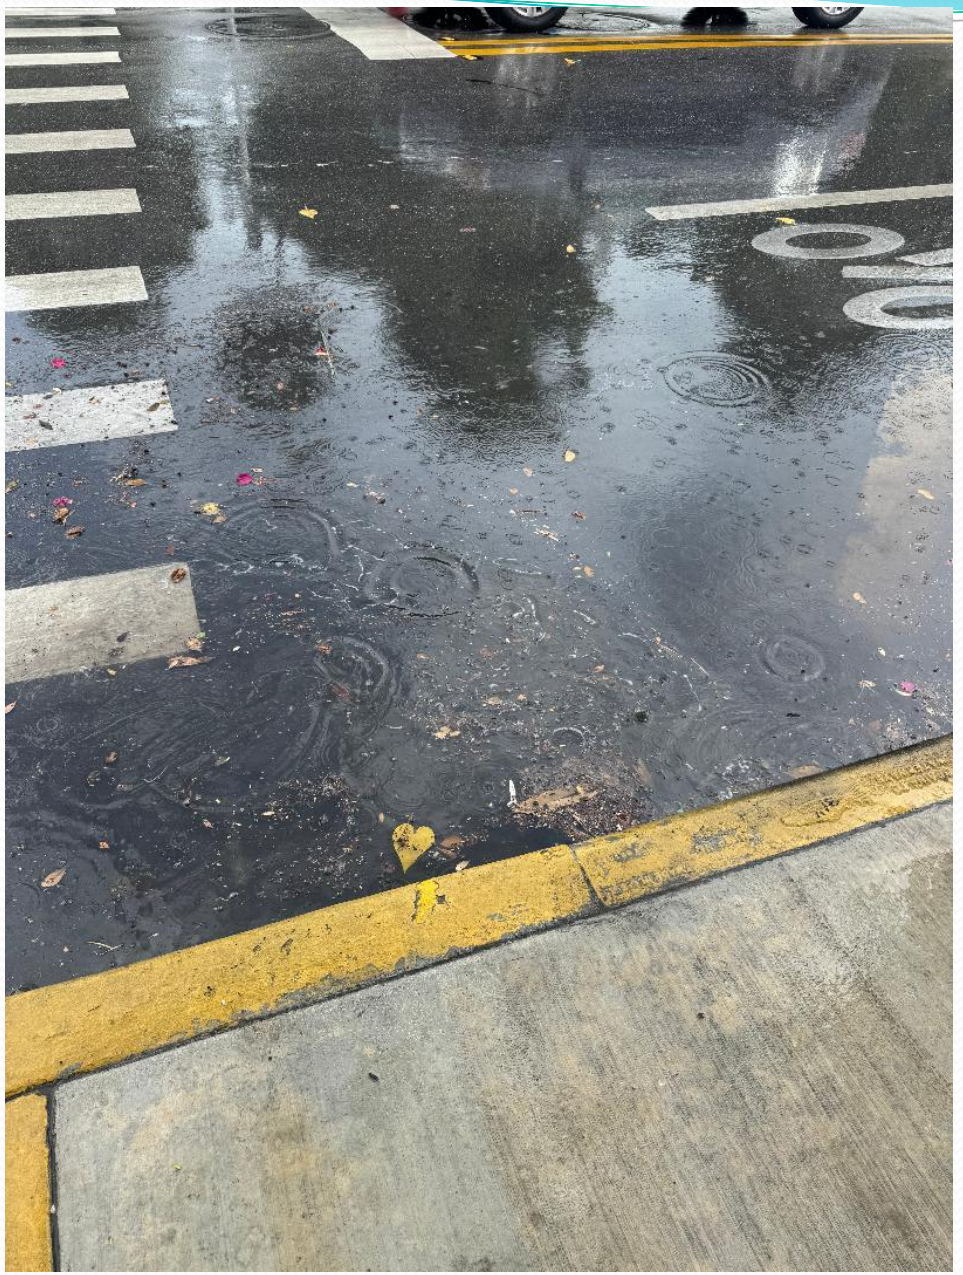

Southernmost Point 1960s

Community Minutes 2021

"It was suggested by the SMPC that the City generate a strategic plan for the Southernmost Point area as the area is one of the most visited locations on the island. Suggestions included that portions of Whitehead and Southern Street become one way and restricted to residential traffic and residential parking. This would support hosting weekly food markets, bazaars and similar pedestrian events. Strategic planning would include a comprehensive tree strategy, expansion of cobblestone street pavement; appropriate soft lighting, street pedestrian walking, attractive trash cans (emptied as needed) that are coordinated with the established pocket park at the Southernmost beach and 5 MPH speeds for residential vehicles."
